RAMAN SAHU

JAVA DEVELOPER

Siddharth Bungalows, Vadodara, Gujarat, India
7609015102
RamanHero.vercel.com
Gmail I LinkedIn I GitHub I LeetCode

Full-stack Java developer building secure Spring Boot backends, optimized database schemas, and event-driven microservices for real-time data pipelines.

Projects

SKILL SCALE [Live Demo]

Multi-Stage Testing platform delivering dynamic assessments in real time by analyzing behavioral patterns phase-by-phase.
Tech Stack: React 18, Monaco, Web Workers, OAuth2, Spring Boot 4, Java 24, FastAPI, Python 3.13, Gemini 2.0, Postgres 17, Judge0, Docker.

- **High-Fidelity Behavioral Telemetry Pipeline:** Built a zero-latency client-side telemetry engine using React useRef matrices, harvesting **7+ real-time behavioral vectors** at **sub-10ms** precision to measure user cognitive friction.
- **Remote Code Execution Sandbox & IDE Integration:** Engineered a web IDE combining Monaco Editor with a secure reverse proxy to route **Judge0 API**, processing **1,000+ daily runs** with **<500ms latency**.
- **Dynamic Multi-Stage Testing (MST) Engine:** Designed an adaptive assessment loop in **Java 24 (Spring Boot 4.1)** that dynamically increases difficulty based on candidate proficiency. Built a **FastAPI microservice** streaming telemetry to **Gemini 2.0 Flash** via strict Pydantic v2 schemas, keeping transitions **sub-500ms** with 0% AI parsing errors.

CAREERCOPILOT [GitHub]

AI-powered career management platform combining company intelligence, interactive roadmap tracking, and skill-gap analysis.
Tech Stack: React.js, TypeScript, Tailwind CSS, Spring Boot, MySQL, Docker, Postman, JWT Authentication, Spring Security.

- **AI-Driven Predictive Career Roadmap Engine:** Architected a nested state engine converting high-level career goals into dynamic learning roadmaps, reducing student planning overhead by **60%** across **50+** technical domains.
- **Skills-Gap & Company Telemetry Pipeline:** Engineered an automated pipeline integrating **JSearch** and **Clearbit APIs** to analyze hiring metrics across **100+** companies with **<1s** ingestion latency.
- **Adaptive Skill Diagnostic Pipeline:** Developed an assessment framework matching candidate competencies against real-time market needs with **95%+ precision** to generate targeted remediation paths.
- **Hybrid Relational Data Layer:** Designed a secure **Spring Boot** and **MySQL** backend with **Spring Security & JWT**, optimizing nested queries to achieve **<200ms** p95 API response times.

Skills

- **Languages:** Java, SQL, HTML, CSS, TypeScript, JavaScript (MERN), Python, C.
- **Backend & DB:** Spring Boot, REST APIs, CRUD, JPA/Hibernate, JDBC, MySQL, MongoDB, PostgreSQL.
- **Frontend:** React, Routing, State Management, API Integration.
- **Tools & Cloud:** Git, GitHub, Docker, Postman, IntelliJ, VS Code, Maven, AWS.
- **Core Concepts:** Object-Oriented Programming (OOP), Multithreading, Java Collections Framework.

Education

- **Parul University** B.Tech in Artificial Intelligence & Data Science 2023 – 2027
- **Centurian Public School** 12th Board (CBSE) 2023

Achievements & Certifications

- Codeversity National Hackathon, IIT Gandhinagar 2025
  Competed at a national level, developing solutions under strict time constraints.
- PU Code Hackathon 3.0, Parul University 2025
  Collaborated in a team environment to build and pitch a functional prototype.
- Generative AI Mastermind, Outskill 2024
  Gained hands-on experience integrating Cloud LLM APIs and prompt engineering.
